General Precaution on Environment

Be sure to keep at room temperature
1.2 Outline
Introduction to BT Link

BT Link is software for use only with patient monitors which are manufactured by BIONET Co., Ltd. BT Link (Full Version) can be connected up to 64 patient monitors. This system is able to track and save parameters as well as waveforms. The software will allow you to retrieve as well as register patient information.

1.3 Product Component

Main features of the product

BT Link is software developed by Bionet America Inc in order to provide a centralized way of viewing data from multiple Bionet monitors.

Program Composition

BT Link consists of two different programs:

1) BT Link, which implements the server functionality.

2) BT Link Review, which provides access to the local patient database for easy evaluation of data post monitoring.
**System Requirement**

The minimum system requirements to run BT Link are below:

<table>
<thead>
<tr>
<th></th>
<th>Minimum Requirement</th>
<th>Recommended Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>OS</strong></td>
<td>Windows XP</td>
<td>Windows XP (32bit) or Windows 7, 8, 10 (32/64bit)</td>

Installation

1. Installation of BT Link
   1.1 Installation in Windows 7,8,10

2. Uninstallation of BT Link
   2.1 Uninstallation in Window XP & Windows 7

3. Execute / Close BT Link
   3.1 Execute BT Link Program
   3.2 Close BT Link Program
1. Installation of BT Link

1.1. Installing on Windows 7, 8, 10

1) Run “Setup.exe” as administrator (Right click on setup.exe will show the menu).
2) If window-browser pops up as follows, click “Yes”

![User Account Control](image)

3) BT Link installer will look for a Microsoft Visual Studio Packet and if not found, it will prompt the user to install it by pressing “Install”. If the packet is already installed, installer will skip to step 4.

![BTLink - InstallShield Wizard](image)
4) Once the Install Wizard appears, click “Next” to start the installation setup.

5) If a new installation location is not needed click on “Next”, otherwise select a new path where to install BTLink by pressing the “Change…” button.
6) Review installation setup and if correct click on “Install”

7) Once the installation is complete, click on “Finish” button.
8) If installation is successful, you will see the “BT Link” and “BT Link Review” Icons on your desktop.

![BT Link Icons on Desktop](image)

9) Before we can run either software, we have to set them up to “Run as an administrator” Right click on each icon and select “Properties”.

![Right Click on Icon](image)

Then check “Run this program as an administrator” as seen in the picture below, after which press “Ok”
10) Double click on the BTlink.ico

11) When the User Account Control window shows up for BTCentral, click “Yes”
12) If this is the first time BT Link in installed, the Windows Security Alert window will be displayed on the screen. Make sure to check the “Private networks, such as my home or work network” option then click on “Allow access”. If for some reason this window does not show up or Access was not granted during installation, follow Steps 13 to 18 otherwise you are done.
13) Click on "System and Security" in Control Panel.
14) Under the Windows Firewall option, click on “Allow an app through Windows Firewall”
15) In the Allowed apps window, first click on “Change settings” button. Once done, the “Allow another app” button will become available and now you can click on it.

![Allowed apps window](image)

16) The “Add an app” window will now be displayed. Press on the “Browse” button and navigate to the folder where BT Link was installed. If the path was not changed during installation, the default is: “C:\Program Files (x86)\Bionet\BTLink”. Select “BMCentral.exe” and press “Open”
Add an app

Select the app you want to add, or click Browse to find one that is not listed, and then click OK.

Apps:

Path: 

Browse...

What are the risks of unblocking an app?

You can choose which network types to add this app to.

Network types...  Add  Cancel
17) Make sure BMCentral is selected and click on “Add”

18) Before pressing “OK” in the Allowed Apps window, please make sure that BMCentral was added to the list as well as the Private Checkbox is selected and in the picture below. We do not recommend allowing access to public networks.
Caution

Please make sure that there is enough free space on your computer such that BT Link can successfully save patient data. When running BTLink user can select the location where all the data can be saved by clicking on the settings icon then go to System -> System Settings.
2. Uninstallation of BT Link

2.1. Uninstallation in Window XP & Windows 7, 8 and 10

1) Back up the Data Base file, named “BEyell.mdb”, located in “C:\Program Files(x86)\Bionet\BTLink\Data”

2) Open up Control Panel and click on “Uninstall a program” from under Programs category
3) Then, select “BT Link”. Click “Remove/Modify” or “Uninstall” button.

Caution

Measured data and images saved for interlocking with EMR, which are occurred while executing BT Link program, are not deleted. Decide whether you are going to use the data and remove it manually.
3. Execute / Close BT Link

3.1. Execute BT Link

1) Double-click “BT Link Server” Icon on Desktop.

2) This is basic design of BT Link.
3.2. Close BT Link

1) If you want to close BT Link program, click the close button indicated below.

2) When the dialogue for closing the program appears, click “Yes” button.

<table>
<thead>
<tr>
<th>Caution!</th>
</tr>
</thead>

1. Basic functions of the program

1.1. BT Link Structure

Basic Design of BT Link

Main Menu

The main menu consists of Patient Manager, User Manager, Channel Display for connected clients, Client Window Setting, and Run “Review Program”.
**Client Window**
The client window automatically opens when a patient monitor is connected to BT Link. Each individual patient monitor will have their own dedicated client window. You can check the monitor’s parameters and waveforms in real time and remotely control the monitor settings. 1.2. Main Menu

---

**Previous / Next Page**
To shift page back and forth.
(If the end of data is reached in either direction, the respective button will be disabled.)

**2 Channels**
To select the number of patient monitor’s data being displayed on the screen.

**Patient Manager**
Register patient information.

**Executes BTLinkReview**
Opens up BT Link Review in order to access saved patient data from local database.

**Configuration**
Manage BT Link software settings.

**Exit**
Quits BT Link software.

**Date/Time**
Displays current date and time.
1.3. Client Window

**Client Information**
This displays patient information from the monitor.
The message format is as follows: “Bed number: Unit name, Patient name”

**Alarm Alert**
This displays any type of alarm information from the monitor.

**Recording Time**
This displays the total time spent on recording real-time data from the patient monitor.

**Basic Menu**
- Admit/Discharge patient to each patient monitor and to the dedicated BT-Link client window of the monitor. Manage patient information from BT-Link patient database.
  (After admitting a patient, record button will appear on the client window bar.)
- Click this button to start recording (This button means that currently BT-Link is not recording any data).
- Click this button to stop recording (This button means that currently BT-Link is recording...
Retrieve numeric data from the patient monitor

1) Patient ID: You can specify the patient ID to retrieve. Leave this part blank to retrieve data from for all patients.
2) Period: Total time period that you would like to retrieve data for (I.E. if 1 hour is selected, software will retrieve data stored in the monitor in the past hour)
3) Interval: Time interval between each retrieved data.
4) Acquire Data: Start retrieving data from patient monitor.
5) Copy to Clipboard: Copy retrieved data to PC clipboard such that you can paste it to any text file.
6) Save as: Save retrieved data in a text file.

Alarm sound is “ON”. Click this button to deactivate alarm..
Alarm sound is “OFF”. Click this button to activate alarm.

Settings for client environment.

Closes client window. If connection with monitor is lost, this button will be enabled.

- **Display Waveform**
  This section of the client window displays the waveforms /bio-signals from patient monitor in real time.

- **Display Parameter**
  This section of the client window displays the numerical data obtained from each patient monitor.
2. Operation of Program

2.1. Minimization/Maximization of Program Window

When the BT Link window mode is set as a window mode, the maximization/minimization function can be used.

Screen Return

If BT Link is minimized, the icon will be automatically hidden in Start menu bar. In order to display BT Link on the screen again, left click on “Show hidden icons” from Start menu bar and right click on the BT Link icon and select show.
2.2. Manage patient information

In order to manage patient information, click on the “Patient Manager” button which is located on the Main Menu of BT Link. Here you can add, change, and delete the patient information.

Search for a specific patient
1) Click “Patient Manager” from Main Menu.
2) Fill out the patient’s information in the provided fields.
   a. Leaving the patient information fields blank, BT Link will display data from all patients in the local data base.
   b. If the patient in question was discharged, make sure that the “Include discharged patient list” box is checked.
3) Click “Find” button.
Register a new patient

1) Click “Patient Manager” from Main Menu.
2) Click “Add New” button.

Input patient information and press “Ok”.

Patient ID: P10
First Name: GILDONG
Last Name: HONG
Gender: Male
Registration Date: 2015-05-13
Status: Admit
Birthday: 2015-05-13
Height: cm
Weight: kg
Comment:

Ok
Changing patient information
1) Click “Patient Manager” from Main Menu.
2) Search for patient in question.
3) Select patient information from list.
4) Click “Modify” button.
5) Change the patient’s information.
6) Click “OK” button to save.
Deleting patient information

1) Click “Patient Manager” from Main Menu.
2) Search for patient in question.
3) Select patient information from list.
4) Click “Delete” button.
2.3. Software Settings

In order to access the “Settings Window”, please click on the “Configuration” button.

General Tab

- **Unit**

In this section, the user can select different units of measurement.
**Display**

In this section, the user can select to enable or disable different options for the client window display.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Save last display mode</td>
<td>Enable Position Fix</td>
</tr>
<tr>
<td>Vertical alignment</td>
<td></td>
</tr>
</tbody>
</table>

**Monitor Display Setting**

In this section, the user can choose to run BT Link in window mode or full screen mode. There is also the possibility to display information on two different computer monitors. Each monitor will display a full screen version of a client window.

**Screen Auto-Lock**

This provides a screen lock function to inhibit users from making changes in the program without a password. The lock function has a one-time lock mode and cycle lock mode. The cycle lock function blocks the screen, if there is no movement detected from the mouse or no keyboard input for a duration of time designated by the user. There is no initial password so we **HIGHLY** recommend setting up a new password if you plan on using this feature.

**Alarm**

In this section, the user can choose to enable or disable audible alarms from the software. If alarms are disabled here, there will be no audible sound even if alarms are enabled in the client window. The user can also select which types of alarms will be displayed on the screen.
Default Client Setting
These are the default settings for when a new client window is created.
System Tab

- Enable Database Auto Delete

If enabled, the local database will be cleared of any information that is outside of the user selected range (I.E. If 1 month is selected, any data older than 1 month will be discarded)

Enable Auto Recording

- Enable Auto Recording at Monitor On/Off: If this feature is enabled, the patient monitor will automatically start recording data when powered on and stop data recording when it is powered off. Because of “Admit” of the patient is done automatically, the patient ID will be saved in the form of “Unknown_” + “Bed Number”.

- Enable Auto Recording at Admit: If this feature is enabled, data recording will start as soon as a patient is admitted.
Client Window Setting
If this feature is enabled, the client window will be close after a given period of time if connection to the patient monitor is lost.

HL7 Setting
This allows the software to send out data in the HL7 format to an external EMR server at a user defined time interval. The user must input the “Server IP” and “Port” number of the EMR server as well as select if acknowledgment message confirmation is enabled “Check ACK”.

System Setting
The user can designate a custom path for storing the database as well as select a preferred language.
2.4. Client Window Menu
   Admit / Discharge

1. Click Admit/Discharge Icon from client window.
2. Input “Patient Information” and click "Find" button.
3. Find patient information of which you want to admit from the list and then, select it.
4. Click "Admit" button.
Record Start/Stop

Click “Start Recording” Icon from “client window”. This button will be displayed only after the patient has been admitted.

Once data recording has started, the icon will change to and by clicking on it again, the data recording will end.

Alarm Sound On/Off

BT Link is able to receive alarms from the patient monitors that are connected to it and display them on the screen accompanied by audible alarms as well.

By default, the audible alarms will be disabled. By clicking on the Sound Alarm icon, the user will activate audible alarms and the icon will change to . Click again to turn off alarms.
Display Setting

1) The user can access the client window settings by clicking on the Client Setting Icon.

2) The “Client Setting” will be displayed and the user will be able to select what waveforms they will want to be displayed on the client window.
   Click “OK” button once done.
NIBP Start/Stop
(It only supports Protocol version 1.2.0 and higher.)

1) The user can access the client window settings by clicking on the Client Setting Icon.
2) Click "NIBP GO/STOP" button.
Synchronization of Equipment Settings
This function sets or checks the setting information of the equipment remotely.

1) The user can access the client window settings by clicking on the Client Setting Icon.

2) Once the “Client Setting” window is displayed, in the “Device Setting” section, the user can select which monitor settings they want to change.

3) After changing information, click on the “Send” button to complete the changes..
The items that can be changed and checked for each button are as follows.
(Due to the characteristics of each equipment, some functions can be deactivated.)

A. Admit Info
   - Patient ID, Name, Gender, Birthday, Age, Height, Weight

B. Alarm
   - Alarm Level, Alarm Range

C. Monitor
   - Parameter On/Off, Parameter Display Info.

D. User Service
   - Device Type, Device Version, Date/Time, Unit name, Bed number, Filter

1.1. Execute BT Link Review

Use of BT Link Review

BT Link Review is the program for reviewing and analyzing of patient data measured through BT Link. BT Link Review provides multiple different methods for displaying the data stored in BT Link database for a maximum of 10 days. It also provides the possibility of printing the stored data according to various options.

Execute BT Link Review

There are two ways in which BT Link Review:

1) Double clicking on the BT Link Review Icon from the desktop

2) Pressing on the "BT Link Review" button from within BT Link.
Once the program is executed, the window below will appear.

1.2. Closing BT Link Review

To close BT Link Review program, click “Exit” icon marked on the image below, and the program will terminate.
2. BT Link Review Program Structure

3. How to use BT Link Review Menu

3.1. BT Link Review Menu

- **Study List**
  Calls save list from database.
✓ **Close Study**
   Closes current loaded study.

✓ **Print Preview**
   Provides a preview for current layout before printing.

✓ **Print**
   Print out desired files.

✓ **Configuration**
   Provides access to BT Link Review settings.

✓ **Start/End Position, Previous/Next Page, Previous/Next, Move**
   Navigates through loaded data.

✓ **Alarm View**
   Track alarm, graphs and parameters when an alarm is detected / triggered.

✓ **Wave View**
   Display graphs and parameters.

✓ **Tabular Trend**
   Display parameters and alarms in a tabular trend.

✓ **Graphic Trend**
   Display the trends of parameters as graphs.

✓ **ECG View**
   Display ECG waveform and HR Trend.

✓ **Exit**
   Quit application.
3.2. BT Link Review File Control

Open File

1) Click on “Study List” button.
2) In the “Search” section fill out the patient information to search the database for data or if interested in seeing an entire list, leave all fields unpopulated and search.
3) Select a file from the list and press on “Access” to open it.
Closing File

1) Select the tab from the left side which you want to close.
2) Click “Close Study” button.
File Modify

1) In order to modify a file's information, follow the steps from “Opening a File” and at the end, click on “Modify button"
2) “When the “Modify Study Information” dialog box is displayed, click on the “…” button.

3) When the “Select Patient” window is displayed, select the patient information you want to change and click “Ok”. 
4) Once the “Modify Study Information” window is displayed, complete the change by clicking on the “OK” button.
Deleting a File

1) Make sure you select the correct file. There is no turning back once the “Delete” button is pressed.

2) Click “Delete” button.
3.3. BT Link Review 5 Different View Modes

1. Alarm View

This mode shows the stored data analyzed by alarm.
The screen is composed of alarm, waveform, and parameter information.

Click “Alarm view” button.

It can show alarm state of each parameter. Click “square”, highlighted with red in the picture. The color of the square will be changed accordingly by the alarm level setting of each parameter, then you can track and shift the alarm state every minute. (Please see above figure.)
In the first section of the “Alarm Review”, highlighted with red in the picture above, displays the overall alarms for each specific parameter.
2. Wave View

This mode shows the stored data analyzed by waveform.

The screen is composed of only waveform information.

Click “Wave view” button.
3. **Tabular Trend View**

The mode shows the stored data analyzed by parameter.

The screen is composed of parameter and alarm information in a table form.

Click "Tabular Trend" button.

In the “Time Period” drop down menu, the user can select the time difference between each data point.
4. **Graphic Trend View**

This mode shows the stored data analyzed by graphical trend of the parameters. The screen is composed of parameter information in a graph form.

Click "Graphic Trend" button.

In the “Time Period” drop down menu, the user can select the time difference between each data point.
5. ECG View
This mode shows the stored data analyzed by ECG waveform.
The screen is composed of waveform and HR Trend information.
(1) Click "ECG View" button.

** The user can see the waveform and HR information in the selected time zone by clicking on the ECG and HR Trend area.
** The user can print ECG waveform of specific time zone by dragging the area with mouse then click print button

In the “Time Period” drop down menu, the user can select the time length on the selected time zone
3.4. BT Link Review Print preview

BT Link Review, Preview settings

It provides the function for previewing measurement data with a current view mode such as alarm view, trend view, wave view, etc.

The image below is the window for print preview. (The bottom area of the selection dialog box is displayed only in “Wave View” and “Tabular Trend.”)

Option details of print dialog box

✓ Current: It shows the data area currently displayed on the screen.

✓ Selection: It provides the function of selecting the print range for the user. The print area can be selected by the second unit.
BT Link Review Preview result
The below image is the preview screen of the “Alarm View.”
If you click on the “Print” button in the preview screen, you can print.

BT Link Review Print
This provides the function of printing the alarm, parameter, waveform, and patient information from the current screen according to the selected option. If you click on the “Print” icon marked in the menu below, the dialog box is printed out. The setting area is the same as the preview screen.
3.5. BT Link Review Preference

BT Link Review Preference

- Display: In this section, the user can change colors and scales for each parameter’s waveform as well as select some graph settings as well.
- Visible Setting: In this section, the user can select which parameters they want displayed on the screen.
- System: In this section, the user can select the location of the data base as well select the preferred language for BT Link Reviewer.

**Caution**

In the “System” of “preference” in BT Link Program, please select a folder with a sufficient amount of remaining space. If the space is not sufficient, the data may be lost or the program may not operate properly.
